# ESTELLE MANOR

HOTEL

A wonderful, dreamy rural getaway and luxury destination, with 108 rooms and suites, four restaurants and a soon-to-open multi-level spa. When we were asked to design the blown-glass lighting for this location, it was immediately clear for us on how to succeed. This is because we know that Made in Italy designed sparkling glass well accompanies complex, sophisticated and elite atmospheres. For this project the realization of the elegant and seductive table lamps and chandelier, reflects a unique piece tailored to the client's requests following a rhythmic and dynamic effect of breathtaking curves.

# HOTEL LA FANTASIE

HOTEL

Muted greens, warm yellows and touches of coral. This super glamorous color palette reflects all the playfulness and eccentricity of designer Martin Brudnizki, with whom we once again had the pleasure of collaborating. The atmospheres of the interior spaces are inspired by the overwhelming magic of nature creating delicate harmonies and irresistible rhythms between shapes and colors.

In this project we were pleasantly involved in creating blown glass lighting with a soft and velvety scenic effect to radiate a relaxing and positive feeling.

HOTEL

Le Grand Mazarin. A unique, luxurious and serene escape in the heart of Paris. This interior design project is inspired by the magnificence of classicism typical of the "Grand Siècle." This magnificent representation involved all the prestige of Sogni Di Cristallo's Made In Italy blown glass, where the traditional technique of Murano glass made in the Venetian hinterland played an important role. In particular, this realization enhanced our Heritage collection with its sophisticated textures.
